consumer protection to active **Coordination Rights** -- the structural guarantees

EVIDENCE LEVEL: E0 STATUS: CONCEPTUAL_PREVIEW MODULE: 5

Coordination Rights

Framing the constitutional conditions under which collective market action
right to decline participation.

This derived research essay is authored under **Editorial Derivation Brief
exchange for marginal financial incentives, discounts, or algorithmic convenience.

1. Beyond Passive Consumer Protection

Traditional regulatory architecture models the buyer as a passive recipient
flexibility commanded by the proposed collective position,
they retain an absolute

While essential, this framing treats the buyer as an atomized, passive recipient

DC2SC Module 05 establishes that meaningful agency requires a shift from passive
legitimate, complete research outcome**

independent outside option provides superior utility, autonomy, or temporal
definition.

2. Non-Compensable Rights Floors

The core thesis of DC2SC governance is that **rights floors are non-compensable**.

A market intermediary cannot ask participants to forfeit baseline rights in

3. The Right Not to Aggregate

without a platform lockout, reputational degradation, or exit fees -- is coercive by
A central tenet of the DC2SC framework is that **"Do not aggregate" is a

Coordination is not an obligation. If an individual participant finds that their

A coordination mechanism that penalizes participants for opting out -- whether

in exchange for price discounts yields non-admissible negative infinite welfare.

4. Failure Modes Tracked

Under the **DC2SC Failure-First Framework**, Module 05 tracks three key failure

Rights Degradation (FAIL-05): Compromising privacy or exit rights to satisfy

Contestability Blockade (FAIL-06): Representatives or algorithms ignoring

Outside Option Erosion (FAIL-12): Suppliers penalizing individual buyers who

It does not constitute commercial claims, supplier commitments, or live transaction guarantees.

5. Research Handoff to Module 06

With constitutional coordination rights defined, the theoretical framework must be

MATHEMATICAL INVARIANT // AXIOM 5.1: NON-COMPENSABLE RIGHTS FLOOR INVARIANT (Eq. 5.1)

$$\forall i \in P, ; R_i \cap F_{floor} = \emptyset \implies U_i(x, R_i) \equiv -\infty$$

Fundamental constitutional rule stating that trading away non-compensable rights floors
