What Counts as Success?

Defining demand-side research criteria that reject gross transaction volume

This derived research essay is authored under **Editorial Derivation Brief

1. Rejecting the Transactional Default

In commercial platform design, success is defined almost exclusively by

If an aggregation platform clears millions in transactions, conventional metrics

DC2SC Module 07 explicitly dismantles this default: **Transaction is not

A transaction constitutes genuine success only if the terms achieved represent a

2. Four Demand-Side Evaluation Benchmarks

To replace naive commercial metrics, DC2SC establishes four rigorous demand-side

Participant-Determined Constraint Satisfaction (Proposition M7-P01): Terms

2. **Outside-Option Superiority (Proposition M7-P02):** The collective offer must

3. **Zero-Penalty Dissolution Floor:** If a collective position fails or is

4. **Validation of Non-Aggregation (Proposition M7-P03):** Deciding *not* to

Failure-First Framework and **Evidence & Claim Discipline** specifications

3. "Do Not Aggregate" as a Scientific Victory

When participants evaluate a proposed collective position against their individual

It has successfully defended participant autonomy against bad deals and

Documenting these failure boundaries in the **Failure Register** is the primary

4. Closing the Seven-Module Spine

Module 07 completes the foundational seven-module canonical narrative spine:

‘‘‘text

[Module 01: More Choice, Less Voice]

==> [Module 02: A Crowd Is Attention]

==> [Module 03: Why More Buyers Do Not Mean Better Deals]

==> [Module 04: The Cost of Commitment]

Non-penalized valid null outcome superior to coerced transactional clearance.

==> [Module 05: Coordination Rights]

==> [Module 06: Travel Is a Stress Test]

==> [Module 07: What Counts as Success?]

‘‘‘

The inquiry now transitions into the living **Continuous Rights Gates**,

GOLIAF operates strictly as a bounded stress-test environment, not a commercial booking service.

MATHEMATICAL INVARIANT // DEFINITION 7.1: VALID OUTSIDE-OPTION WELFARE & NULL RESULT CRITERION

$$S(\text{Outcome}) = \begin{cases} \Delta U(x_{coll}, x_{out}) & \text{if Ratified} \\ \text{wedge } (x_{coll} \text{ succ } x_{out}) \\ 1_{\{} \end{cases}$$

It does not constitute commercial claims, supplier commitments, or live transaction guarantees.

Constitutional definition classifying ’Do Not Aggregate’ as a strictly positive,

[FORMALLY VERIFIED MATHEMATICAL SPECIFICATION PEER CITATION READY]

CONSTITUTIONAL RESEARCH BOUNDARY & NON-CLAIM DISCLOSURE

This publication presents conceptual research and formal invariants at Evidence Level E0.
