agility and time without acquiring institutional power over contractual terms.

In conventional platforms, the platform represents itself, not the buyer cohort.

Why More Buyers Do Not Automatically Mean a Better Deal

Volume without ratification, representation, and explicit exit rights

collective position satisfies their stated non-compensable constraint floors.

This derived research essay is authored under **Editorial Derivation Brief

counterparty, aggregated demand must satisfy three strict constitutional gates:

negotiating terms must hold a verifiable, contestable mandate from participants.

1. The Fallacy of Raw Scale

Independent outside options. Without credible exit, volume becomes captive demand.

A pervasive axiom across digital commerce and platform design is that pooling

cannot clear automatically. Participants must explicitly ratify whether the

However, DC2SC Module 03 demonstrates that **volume alone is not countervailing

When independent buyers join an ungoverned aggregate pool, they forfeit individual

ratified position, participants must possess a zero-friction exit path to their

2. The Three Constitutional Gates of Market Authority

To transform passive buyer volume into a recognized, countervailing economic

Explicit Representational Mandate (Proposition M3-P01): The entity

2. **Participant Ratification (Proposition M3-P02):** Proposed supplier terms

3. **Credible Exit Rights (Proposition M3-P03):** If a supplier rejects the

3. The Counterintuitive Cost of Passive Volume

When buyers wait in an unstructured pool expecting scale benefits:

Opportunity Cost Accumulates: Individual search alternatives and temporal

question: what does it actually cost participants to commit to a collective

windows degrade as participants remain bound to the collective timeline.

Intermediary Rent Extraction: The coordinating platform monetizes the

Averaging Down Preferences: Without fine-grained constraint matching,

Scale without structural rights is an audience capture mechanism, not buyer

4. Failure Modes and Analytical Limits

Under the **DC2SC Failure-First Framework**, Module 03 monitors three primary

Representation Drift (FAIL-02): The negotiating representative modifies

exit friction outpace raw bargaining leverage, reducing net participant welfare.

Ratification Breakdown (FAIL-03): Low participant engagement enables vocal

Exit Friction (FAIL-05): Penalty structures or cancellation hurdles prevent

GOLIAF operates strictly as a bounded stress-test environment, not a commercial booking service.

5. Research Handoff to Module 04

Establishing that scale requires structural governance raises the next fundamental

MATHEMATICAL INVARIANT // LEMMA 3.1: DISECONOMY OF UNRATIFIED SCALE & COORDINATION DRAG (Eq.

It does not constitute commercial claims, supplier commitments, or live transaction guarantees.

$$W(B_N) = \max \{ 0, ; \gamma * \log(N) - \kappa * \sum_{i=1}^{N} D_{KL}(F_i \parallel \bar{F}) - \Delta_{exit}(N$$

Establishes that beyond a critical cohort threshold N^*, heterogeneity divergence and
